

Fullstack, Backend Engineer (Remote)

COMPANY OVERVIEW

Using NFT technology, the company offers a secure and trusted platform and has enabled \$100M+ in digital art sales.

POSITION OVERVIEW

We offer a platform aimed at empowering digital creators to create and sell their unique pieces while providing verifiable proof of authenticity, ownership, and scarcity on the blockchain.

About the Role

We are looking for a strong leader to join our team and work with us to invent the future of the digital economy. We need someone who can easily lead by example and demonstrate accountability and impact. This candidate will care deeply about their team and work to help them grow and achieve wildly amazing results. This person has worked in many stacks and frameworks and has deep knowledge in architecting reliable cloud systems at scale.

Our Principals

- Clear and measurable objectives (focused on user value)
- Isolated, Independent, single-responsibility services
- Starting small and failing fast
- Experimentation and Innovation
- Test Driven Culture
- Prioritize learning

You Have

- Degree in Computer Science or equivalent work experience (8+ years programming).
- A strong customer-first mindset is necessary to build a world-class product.
- Strong communication skills. We're a highly collaborative team.
- Experience with a dynamic programming language such as Python.
- Technical Stack
- React, GraphQL
- Python, Django, Celery
- AWS, RDS, Kinesis, ElasticSearch, Redis, IPFS
- Solidity, Hardhat
- Web3, Ether.js

Benefits and Perks

- Health/Vision/Dental
- \$500 workstation stipend, with an additional \$1000 after 6 months of employment.
- Flexible vacation policy + 1 personal day off / month.
- Weekly team-sponsored lunches
- \$500/Quarter AirBnB stipend— we want you to go out and enjoy life!
- 100% Remote...and more!
